## Shape and Color Options

TerraClad™ panels, baguettes and louvers are available in a variety of standard colors, sizes and profiles.

Additionally, Boston Valley has the ability to provide custom shapes and colors, both through-body and glaze, to complete your building design.

## Innovative Manufacturing in Architectural Ceramics

The TerraClad™ rain screen system is designed to mitigate water penetration due to rain. As a ship-lapped, open-joint cladding system, TerraClad™ installations can take place in all seasons. Our pre-punched vertical track and clip system speeds panel installation.

TerraClad™ components and assemblies meet or exceed relevant ASTM, AAMA, and HVHZ (High Velocity Hurricane Zone) test standards.

Miami Dade County, Florida, 08-1014.03 July 1, 2014  
NYC-MEA #120-07-M

Boston Valley Terra Cotta manufactures all of our products in Western New York at our facility in the Boston Valley. Made with raw materials harvested in the United States as well as recycled content, our TerraClad™ system offers LEED point possibilities.
